USFiles Processor-Independent DOS File System

- Processor Independent
- User Configurable
- ROMable and Reentrant
- Includes Full Source
- ANSI C Stream I/O Interface
- Supports Binary and Text Files
- Includes Dynamic .EXE Loader
- Includes Sample Drivers
- Includes Product Conformance Test

USFiles is processor independent and designed for use with real-time, embedded applications. USFiles source is structured with versatility and user customization in mind. USFiles provides complete DOS file system compatibility with an ANSI C stream I/O application interface. USFiles can be used in applications where multitasking is neither an option nor a consideration. Also, it can be used in applications where another multitasking system is already in place. Complete source code is provided.
