LaserAct* 5E Interpreter

- 100% Compatible With the Industry Standard
- Open System to Accommodate Multiple Font Standard
- Agfa's Universal Font Scaling Technology (UFST)
- 300/600 dpi Switchable Technology
- Destiny I/O and Network Connectivity Support
- Data Compression/Decompression Reduces Memory Requirements
- PJL Support
- Bidirectional Communications
- Bezier Capabilities

Destiny's LaserAct 5E builds upon the successful LaserAct 4, 4.5, and 5 (LaserJet* II, IIP, and III-compatible) interpreters and made it's debut less than one month after HP's announcement of the LaserJet 4. By combining software with Destiny's complete line of controller ASICs, LaserAct 5E incorporates all of the functions of the LaserJet 4 with provisions for extended capabilities.

Destiny's LaserAct 5E can be implemented via the controller board, as a daughter card, as a cartridge, or via host-based software.

Destiny's LaserAct 5E includes: Bezier capabilities, full compatibility at 600 dpi, Printer Job Language (PJL) support, bidirectional communications and network connectivity (Destiny I/O - DIO). Further Strengthening Destiny's LaserAct 5E software interpreter is the incorporation of Agfa's Universal Font Scaling Technology (UFST*). Agfa's UFST renders both Intellifont* and TrueType* font formats.
