- Plug and play support
- DMI support as well as ATAPI CD-ROM support
- Enhanced IDE drive support
- LBA mode transfers
- 3 parallel/4 serial ports
- Compression services
- Flash BIOS
- BIOS edit utility

The Award BIOS is a fully featured family of software supporting Intel's Flash memory components. Each BIOS allows for detection and support for all Intel Flash memory components. Also available is a flash utility that enables easy updates of the BIOS or system software. This results in a BIOS that maintains its core compatibility while providing configurability to a vast array of PC hardware options.

INTEL FLASH MEMORY SUPPORTED:

28F010, 28F001BX, 28F020, 28F002BC, 28F002BL, 28F002BV, 28F002BX, 28F200BL, 28F200BV, 28F200BX, 28F200CV, 28F004BE, 28F004BL, 28F004BV, 28F004BX, 28F400BL, 28F400BV, 28F400BX, 28F400CE, 28F400CV
