- Auto card detection
- Hot swapping of PC Cards
- Easy installation
- Supports leading controllers
- Auto-launch for Apps feature
- Memory card format utility
- Small memory footprint
- Resource conflict advisor

The Award PCMCIA Utility CardWare is a fully featured PC Memory and I/O Card enabler and configurator for DOS/ Windows* environments. CardWare comes with built-in support for all Intel Flash memory cards. User interfaces in both DOS and Windows provide easy access to re-configure or re-allocate system resources for any PCMCIA-compliant I/O card. CardWare utilizes DOS Protected Mode Services (DPMS) to reduce its conventional memory footprint to 35 Kbyte making it well suited for many embedded applications.

INTEL FLASH MEMORY SUPPORTED:

Series 2 Cards, Series 2+ Cards, Value Series 100 Cards, Series 100 Miniature Cards
