

## CardSoft\*/CardWizard\*

- FTL support available
- Intelligent installation on a wide variety of platforms
- Support for all PCMCIA socket controllers
- CardWizard\* for easy conflict resolution by end users
- Full support for PCMCIA 2.1 and PC Card standards
- Multi-function card support
- Small DOS memory footprint

CardSoft\* 4.x is the latest generation of Card and Socket Services software from SystemSoft, the leader in PC Card software. CardSoft provides a transparent solution for PC Card compatibility, regardless of the personal computer being used. Combined with SystemSoft FTL\* software, it offers full support for Intel's Flash memory card family as well as the latest specifications and functions of the most-recent PC Card standard (multi-function cards, direct memory addressing and multi-voltage - 3.3V, 5V, 12V). CardSoft requires a minimum of conventional DOS RAM, freeing up memory for other applications.

CardWizard, the PC Card configuration and troubleshooting Windows\* application, lets users diagnose and fix PC Card conflicts in an easy, visual environment. Now, users can resolve PC Card conflicts with a few mouse clicks. CardWizard can detect and automatically configure more than 500 PC Cards including Intel's Flash memory cards. SystemSoft eliminates all PC Card compatibility and interoperability issues. It is a point-and-click PC Card conflict resolution expert system that brings the plug-and-play promise of PC Cards to fruition. It detects, diagnoses, and automatically solves most resource-allocation conflicts that previously plagued PC Card usage. Card Wizard finds and fixes problems such as inadequate memory ranges, unavailable I/O ports, missing device drivers, EMM386

conflicts and many other system-level conflicts. Additionally, CardWizard includes extensive on-line help and expert advice, easy, intelligent installation and upgrading that automatically loads the correct Socket-Service drivers, and complete documentation.
