Phoenix Card Manager*

- Adapts to native block size for the media's memory devices
- Minimizes the need to rewrite any fixed areas in media
- Automatically erases a block first before reclaiming deallocated space
- Distributes evenly the erasure of blocks within media, enhancing performance
- Concurrent background erasures
- Supports Intel Flash memory
- Superior recovery capabilities
- Coexists with other flash file systems
- Multiple partitioning capabilities
- Support for multiple regions

Flash file support is available for anyone using the Intel Series 2/2+ Flash Memory PC cards. By implementing MTD support, Phoenix is able to add support for new flash cards quickly. This reduces time-to-market and costs.

The flash file support makes flash memory appear as readable and writeable disk drives with one integrated driver. Card Manager* provides full PCMCIA compliance and support for multiple technologies on the same PC Card. PCMFFCS.EXE can coexist with other flash file systems and offers excellent recovery capabilities and drive consolidation.

INTEL FLASH MEMORY SUPPORTED:

Series 2 Cards, Series 2+ Cards
