CARDport isa

- Compatible with all PCMCIA Cards
- Full PCMCIA software included
- Quick and easy to install
- Full support for hot-swapping
- High speed data transfer
- Supports card types I, II and III
- Provides two PCMCIA slots

CARDport isa is a universal adapter which empowers your personal computer by the addition of two PCMCIA interface sockets, one socket accessible from behind your PC and one at the front in a 3.5 inch drive bay.

CARDport isa comprises a half card ISA bus add-in board plus drive bay module, both easily installed in your PC.

CARDport isa's accompanying software suite of Card and Socket Services ensures universal compatibility with PCMCIA-compliant cards, offering a wealth of PCMCIA peripherals. Cards in both sockets are simultaneously accessible to all DOS and Windows*-based applications, in a variety of data formats, and there is full support for flash file systems, eXecute In-Place (XIP), and the Quickswap protocols. All in all, if you are looking for performance, flexibility, and universal PCMCIA compatibility, CARDport isa is the solution for you.

INTEL FLASH MEMORY SUPPORTED:

Series 2 Cards, Series 2+ Cards, Value Series 100 Cards, Series 100 Miniature Cards
