PCD-10

- 3 Mbyte/asynchronous data transfer speed
- Available with PCMCIA Type 3×1 slot
- SCSI-2 interface
- Supports all major PC Cards; including Intel linear flash memory, fortezza cards, 5V I/O interfaces

Intermart's new PCD-10 card drive is a value-priced single-slot PC Card reader/writer that provides instant, trouble-free connectivity with DOS and Macintosh* computer systems. Utilizing the same proven firmware as Intermart's well-established dual-slot units, the PCD-10 is the perfect choice for any application requiring operation from a single PC Card at a time, such as digital photography imports and data transfer between laptop and desktop systems. The unit operates with complete hot swap card interchange and recognition.

The PCD-10 connects to DOS systems as well as all Macintosh Powerbook and desk top systems. It plugs and plays in moments, with the ease of any quality SCSI-II device, utilizing the Intermart driver or a broad range of third-party drivers. The units meet all PCMCIA standards, and provide consistent and standardized communication between the host computer and PCMCIA V .2.0/JEIDA V .4.1 Type I-III PC Cards including flash memory, I/O cards and other memory technology.

INTEL FLASH MEMORY SUPPORTED:

Series 2 Cards, Series 2+ Cards, Value Series 100 Cards, Series 100 Miniature Cards
