- 16 -bit ISA bus
- Fits in 3 1/2" or 5 1/4" disk drive bay
- 100% Windows* 95 compatible
- Card and Socket Services software included

The PMC PC-300 Card Socket Controller enables the desktop PC to utilize PC Cards (PCMCIA). By using the PMC PC-300, a large volume of data can be transferred between a notebook and desktop PC instantaneously. It accepts the full range of the Intel Flash memory cards available, easily allowing the free movement of important data, system configuration files and application software.

In addition, digital cameras that store photographic data on Intel Flash memory cards are becoming commonplace. The ability to quickly transfer these pictures to the desktop PC to review, edit and process into photographs is very important. With the PC-300 this is now possible and it is as easy as plugging in the card.

The PC-300 comes ready to install in your desktop PC. It includes everything you will need, including Card and Socket Services software, to get you up and running. A dual socket configuration allows both Type II and a Type III cards to be inserted simultaneously, with no need to swap cards during operation.

INTEL FLASH MEMORY SUPPORTED:

Series 2 Cards, Series 2+ Cards, Value Series 100 Cards, Series 100 Miniature Cards
