

## PILOT-832D

- Programs eight devices at the same time in gang mode or set mode
- Supports flash memory and other programmable memories
- Software-controlled from PC or compatibles through standard printer port
- Easy new device support via disk or modem
- Free lifetime software updates via BBS
- Optionally supports other package types including PSOP, TSOP and PLCC
- Universal 110/230 volt automatic switched AC input
- Made in USA by one of the most dependable programmer manufacturers

PILOT-832D is a very flexible gang/set programmer for programming Intel Flash memory components. It consists of a base machine and a top Gang Module (GM-832D) which has eight DIP sockets for programming eight DIP packages at the same time.

The top Gang Module can use Gang Adapters such as AG-S044A from Advin to program eight PSOP 44-pin devices such as the Intel PA28F400BV. It can also use AG-48A to program eight 48-pin TSOP devices such as the Intel E28F400CV.

The top Gang Module is replaceable with other modules such as the 32-pin PLCC module (GM-832C) or the 44-pin PLCC module (GM-844C) to program 32-pin or 44-pin PLCCs respectively.

Advin provides these and a host of other flexible solutions to make the PILOT-832D the most powerful and flexible gang/set programmer at an affordable price.

PILOT-832D is controlled by Advin's easy-to-use and fast software, operating on IBM PCs and compatibles. Since the PC-interface is through a standard parallel

printer port, no PC slot is required. Therefore you get the benefit of easy portability from one PC to another. You can also operate Pilot-832D from a notebook computer via its standard printer port.

Its macro/batch facility allows you to collect frequently used commands in a macro file which can be submitted later for fully automated operations. This and other popular features make the programmer a time-saving instrument for you. They also shorten the training process for your production people.

Advin Systems Inc. has been a dependable and responsive supplier of reliable programming instruments for over eight years. For quality-conscious engineers who need almost instant support when new devices come to market, Advin's small-company high-quality mentality will fit very well.
