PILOT-MVP

- Universal and flexible. Supports flash memory, PLDs, microcontrollers, etc.
- Software controlled from PC or compatibles through standard printer port
- Easy new device support via disk or modem
- 4 years of free software updates via BBS
- Wide range of package types supported: PSOP, SSOP, TSOP and other package standards
- S/W-programmable universal pin drivers at each pin
- Universal 110/230 volt automatic switched AC input
- Made in USA by one of the most dependable programmer manufacturers

PILOT-MVP, dubbed the most valuable programmer, provides a very cost-effective and reliable solution for programming all Intel Flash memory components and a host of other devices including EPLDs, PALs, PLDs, FPGAs, microcontrollers and many other programmable memories and device types.

All package types of Intel Flash memories are supported, including PSOP, SSOP and TSOP. Package adapters are factory-made, tested and guaranteed to work. This is different from many other programmers which may require use of third party adapters.

PILOT-MVP is controlled by Advin's easy-to-use and fast software, operating on IBM PCs and compatibles. Since the PC-interface is through a standard parallel printer port, no PC slot is required. Therefore you get the benefit of easy portability from one PC to another. You can also operate Pilot-MPV from a notebook computer via its standard printer port.

Its macro/batch facility allows you to collect frequently used commands in a macro file which can be submitted later for fully automated operations. This and other popular features make the programmer a time-saving instrument for you. They also shorten the training process for your production people.

Advin Systems Inc. has been a dependable and responsive supplier of reliable programming instruments for over eight years. For quality-conscious engineers who need almost instant support when new devices come to market, Advin's small-company, high-quality mentality will fit very well.

INTEL FLASH MEMORY SUPPORTED:
