

## PKW-1100-E + RX-1, RX-5, RX-40

- Optimized firmware boosts performance
- Automatic device identification
- Algorithms maximize yield
- Adaptable to suit requirements
- Embedded menus streamline operation
- Powerful command set
- Complete on-line support

The development of multimegabit flash memory technology poses many problems for existing device programmers. Aval prom programmers work excellent with Intel Flash memory components. Already, excessive handling times for megabit devices has led to demands for new innovations in programmer design. Responding to those demands, the PKW-1100 flash programmer offers a new level of hardware performance for efficient and reliable programming at breakneck speeds.

### INTEL FLASH MEMORY SUPPORTED:

28F010, 28F001BX, 28F020, 28F002BC,  
 28F002BL, 28F002BV, 28F002BX,  
 28F200BL, 28F200BV, 28F200BX,  
 28F200CV, 28F004BE, 28F004BL,  
 28F004BV, 28F004BX, 28F004SC,  
 28F400BL, 28F400BV, 28F400BX,  
 28F400CE, 28F400CV, 28F008BE,  
 28F008BV, 28F008SA, 28F008SC,  
 28F800BV, 28F800CE, 28F800CV,  
 28F016SA, 28F016SC, 28F016SV,  
 28F016XD, 28F016XS, 28F032SA
