PKW-3100-E + ADP-B or ADP-D

- Supports a large range of devices: flash memory, PLDs, microcontrollers, etc.
- Flexible adapter family is adaptable to suit requirements
- Large capacity buffer RAM
- Powerful command set and reliable programming
- Fully menu-driven and user-friendly operation
- Complete on-line support

The PKW-3100 offers you the ultimate flexibility of both a hardware- and a software-configured programmer. It is designed to support all major device families, from the densest Intel Flash memory components to the fastest PLDs. The various adapters also offer you usage in production and services as well as development. A big improvement in the operating system over conventional programmers is brought straight to the user by means of a very user-friendly keyboard with a 4 line, 20 column LCD display. A help key resides on the keyboard which guides you through more than 50 sophisticated commands. PKW-3100 contains fully integrated communications software, letting you remotely control its operation via a terminal or your PC.

INTEL FLASH MEMORY SUPPORTED:

28F010, 28F001BX, 28F020, 28F002BC, 28F002BL, 28F002BV, 28F002BX, 28F200BL, 28F200BV, 28F200BX, 28F200CV, 28F004BE, 28F004BL, 28F004BV, 28F004BX, 28F004SC, 28F400BL, 28F400BV, 28F400BX, 28F400CE, 28F400CV, 28F008BE, 28F008BV, 28F008SA, 28F008SC, 28F800BV, 28F800CE, 28F800CV, 28F016SA, 28F016SC, 28F016SV, 28F016XD, 28F016XS, 28F032SA
