APRO

- Engineering model universal flash programmer
- 40-pin gold DIP socket, expandable
- All package styles supported
- RS232-based with local CPU (115.2 Kbaud)
- 8-Mbit RAM standard, upgradable to 64-Mbit
- Supports Intel 8-bit microcontrollers
- Intel-evaluated
- Insertion-check, auto erase, blank check, verify
- Lifetime free SW/FW updates via 24-hour BBS

System General's APRO is the perfect system for designing with Intel's Flash memory components. Advanced architecture insures reliable board-level operation, thus limited production and prototyping can be supported.

Download your file from a PC or server/network and erase/program/verify any of the latest Intel Flash memory offerings. Priced competitively, the APRO has the architecture needed to support the most cutting-edge memory components without the overkill of universal programmers.

By utilizing Intel-recommended third-party converters (Emulation Technology & California Integrated Coordinators Inc.) the APRO can support all of the latest package-styles at an extremely cost-effective price. Use of only approved algorithms insures optimum yields and complete design-to-board level functional accuracy.

Easy-to-use engineering features allow for convenient editing of data. Additional capabilities include swap-shuffle-split and even serialization! Optional high/low V_{cc} verify can help insure board-level reliability. Boot-block secure features of Intel Flash memory components are handled via pop-up windows to reduce operator error.

A one year HW warranty is standard. Software is always free, available via our 24-hour BBS. Technical support is available from 8:00am to 6:00pm PST.

INTEL FLASH MEMORY SUPPORTED:

28F010, 28F001BX, 28F020, 28F002BC, 28F002BL, 28F200BV, 28F002BX, 28F200BL, 28F200BV, 28F200BX, 28F200CV, 28F004BE, 28F004BL, 28F004BV, 28F004BX, 28F004SC, 28F400BL, 28F400BV, 28F400BX, 28F400CE, 28F400CV, 28F008BE, 28F008BV, 28F008SA, 28F008SC, 28F800BV, 28F800CE, 28F800CV, 28F016SA, 28F016SC, 28F016SV, 28F016XD, 28F016XS, 28F032SA
